THERMAL PERFORMANCE STABILITY VIA PURE ALUMINUM DRIVER TECHNOLOGY

A pure aluminum woofer cone and faceplate provide precise excursion control and durability, meanwhile high-conductivity materials ensure consistent low-frequency SPL output during demanding playback.

ARCHITECTURAL SPACE EFFICIENCY

Stud-bay optimized for new construction installation. Engineered to disappear between standard framing while producing room-commanding low-frequency authority - without sacrificing floor space or design symmetry.

ADVANCED ANTI-VIBRATION ENGINEERING

Internal damping and controlled mounting architecture minimize structural interaction for smoother, louder, and more articulate bass with preserved fidelity and minimal distortion - capable of taking in up to 800-Watts of power unfazed.

DSP-CALIBRATED PERFORMANCE

Precision-tuned via the Origin amplifiers, integrated DSP delivers precise crossover management, reduced distortion, and calibrated adaptable performance for outdoor systems that require high-performance bass.

ARCHITECTURALLY DISCREET, CUSTOMIZABLE MICRO-PERFORATION GRILLE

Fully paintable, low-visibility grille blends elegantly into exterior walls and architectural surfaces while elevating the acoustic experience. Optional custom grille printing service for camouflaged integration into any interior finish.

COMPLETE LIVING SPACE INTEGRATION

Pairs effortlessly with Origin speakers, Blend Invisible Series loudspeakers, and the Origin ProA Amplifier series to create a design-conscious living room system delivering full-range performance with architectural discretion.
